DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the rectangular housing (instead housing is square) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. **Applicant ignored this objection in the previous office action.**

Claim Rejections - 35 USC § 112

2. Rejections have been overcome.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country, in public use, or on sale in this country, more than one year prior to the date of application for patent in the United States.

(

4. Rejection of claims 1-5 under 102e has been overcome.
5. Claims 9-11 and, 14-15 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Liu et al.

Liu discloses an electrical connector comprising a dielectric housing (12), and a plurality of conductive contacts (14) received therein, the housing comprising a plurality of sidewalls (fig. 2) and a bottom portion cooperatively defining a cavity (28) there between; and a pick up cap (16) comprising a planar body with a smooth top surface (fig. 3); wherein the pick up cap is disposed in the cavity (fig. 3) and engages with side walls of the cavity; whereby the pick up cap provides protection for the contacts.

Regarding claim 10 Liu disclose that the contacts protrude a predetermined height “above a bottom” of the housing in the cavity (fig. 1).

Regarding claim 11 Liu disclose that the sidewalls of the housing are comprised in a front side, a rear side, and a pair of lateral sides of the housing (fig. 4).

Regarding claim 14-15 Liu disclose that the pick up cap comprises a head portion, a pair of spaced tail portions, and a plurality of spaced lateral portions with a pair of spaced, parallel latch arms depends from the head portion (figures 1 & 2 at 16).

Response to Arguments

6. Applicant's arguments filed 9/8/04 have been fully considered but they are not persuasive regarding the rejection of claims 9-11 and 14-15.

The Liu et al reference does show a pick up cap (16) "disposed in the cavity" and engaging with the sidewalls of the cavity (fig. 3).

Allowable Subject Matter

7. Claims 1-8 and, 16-19 are allowed over the prior art of record.

8. Claims 12-13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter: In combination with claim 1, specifically the pick up cap disposed between the housing and clip and covering at least a portion of the contacts.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patents listed on the PTO-892 all teach pick up caps with insulative housing and latches.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
